TOYOLED S

PHOS PHORUS

AHMED & HIROYUKI TOYODA
GENERAL TRADING L.L.C.

ABOUT OUR PRESIDENT

HIROYUKI
TOYODA

Hiroyuki Toyoda is a bloodline descendant of the Toyoda family, who founded Toyota Motor Corporation, the company widely known as the largest car manufacturer in the world.

As a member of the next generation of a well established global brand, Hiroyuki Toyoda hopes to contribute to the betterment to the global community by providing the most advanced, environmentally friendly technological solutions to aid sustainable developments around the world. This includes efforts to reduce energy consumption and carbon emissions in developed and emerging countries. It is for this very purpose that Hiroyuki Toyoda established Ahmed & Hiroyuki Toyoda LLC which will offer unique, environmentally friendly products.

AHMED
FAROOQ AL AWAR

As the Middle East is the world's primary oil producing region, Mr. Ahmed Al Awar, who has numerous business relationships around the world has joined forces with Hiroyuki Toyoda in order to achieve the same dream of creating an environmentally friendly, sustainable world.

This new relationship then partnered with Iwasaki Electric Co., Ltd., the current world leader in LED technology. The introduction of Iwasaki's highly efficient and long-lasting LED products to Dubai Sustainable City is the first step towards paving the way for a sustainable global community.

MESSAGE FROM THE PRESIDENT

Toyoda LLC offers products and services of the highest quality that embody the sum of skills and experience nurtured over the years in the Japanese technology industry, and a passion for the well-being of people and our planet. Our LED lighting equipment section has combined the very best in Japanese LED technologies to bring you the "TOYOLED S Series", a product range which covers a vast range of lighting needs from infrastructure such as roads and airports to specialised environments such as oil and chemical synthesis plants.

In addition to their proven functionality, the "TOYOLED S Series" have been designed to provide an aesthetic quality to any environment, which means that our products will bring out the glitz and glamour to a cosmopolitan city while providing unparalleled excellence in user experience and safety.

It is our sincere hope that the lighting solutions offered by Toyoda LLC's products will contribute to the further development of the MENA region and bear witness to its ever-growing splendour for many years to come.

TOYOLED S

PHOS PHORUS

Illuminating the way towards sustainability

GUIDING PRINCIPLES

- We will strive to **protect the environment** by providing **energy-saving products** and introducing **environmental impact reduction systems**.
- We will strive to **reduce energy consumption** including electricity and gas in our business activities.
- We will strive to **promote recycling and reduction of waste** throughout our activities.

PRODUCT CONCEPT

TOYOLED S represents the forefront of lighting technology in terms of aesthetics, energy-efficiency and reliability. As such, they are the perfect lighting solution for a sustainable society.

TOYOLED S can make a positive and direct impact on commerce and society by offering high-visibility on the roads to improve road safety; providing highly aesthetic lighting to streets and public spaces; giving commercial buildings and facilities a unique presence; and giving homes a comfortable and inviting ambience.

LED STREET LIGHTS

Clear Road Visibility Without Dimming

Light distribution performance of the TOYOLEDS ROAD Series is so accurate that waste light and light pollution can be kept to a minimum while illuminating the street or pavement. This provides for more road visibility at night, reducing the risk of traffic incidents.

Our TOYOLEDS ROAD Series delivers an unprecedentedly long lifespan which will guarantee significant cost saving in every aspect.

TOYOLEDS ROAD SERIES

ROAD ILLUMINATION
WITHOUT DIMMING
THROUGHOUT LIFESPAN

LED OUTDOOR HIGH POWER FLOOD LIGHTS

NOVA SERIES 400/200

RAINBOW COLOUR
3 LIGHT DISTRIBUTIONS
WEATHERPROOF/IP65

Shinminato Ohashi (Toyama, JAPAN)

The NOVA Series reduces power consumption and CO2 emissions by 64% in comparison to HID 1kW lights.

These lights have very little need for maintenance and coupled with low running costs, savings increase exponentially over time.

Products in the NOVA series provide ideal LED fixtures for outdoor sports facilities, bridges and façade lighting for public buildings.

LED HIGH BAY LIGHTS

ACE SERIES 210 WIDE/MEDIUM BEAM

ADJUSTABLE BRIGHTNESS
NON GLARE
MAGNESIUM ALLOY BODY

Oberlin University (Tokyo, JAPAN)

Products in the ACE Series are the latest in LED high bay lighting, boasting a long life of 60,000 hours, unparalleled cost-effectiveness and brightness equivalent to HID 300W to 700W.

This series is designed to provide eco-friendly, optimum lighting with minimised glare and a dimming function (PWM method 50-100%) which adjusts brightness to suit the weather, time of day and any other lighting requirements.

EXPLOSION-PROOF LED LIGHTS

Unrivalled quality and advanced technology that sustains and ensures safety in any hazardous area

The ATEX Series offers the very best in function and safety for hazardous environments. The explosion-proof LED lighting in this product range is resistant to a wide range of explosive gases such as hydrogen, with unprecedented power savings of approximately 70% compared to conventional 400W metal halide lamps. The LED module has a lifespan of 60,000 hours and this leads to a significant reduction in maintenance costs for explosion-proof facilities.

ATEX SERIES 20/120

VERSATILE PLACEMENT
COMPLIES WITH
IEC STANDARDS

TOYOLEDs AT THE FOREFRONT OF TECHNOLOGY FOR SUSTAINABLE SOLUTIONS

PIONEERS IN LED TECHNOLOGY

TOYOLEDs OEM technology is used by many major manufacturing firms.

Energy Efficiency of LEDs + *Intuitive Light Distribution Technology* + *Durability and Long Lifespan* = *Maximum Energy Efficiency and Cost Savings*

IMMACULATE TRACK RECORD WITH EXCEPTIONALLY LONG LIFE

Much of Japan's public infrastructure utilizes TOYOLEDs' technology and products, including 100% of the lighting in and around the Imperial Palace Tokyo as well as many prestigious facilities such as luxury hotels.

LEDs currently in use in many of these locations have gone far and beyond expectations as these products, still in use, approach 13 years of continuous usage.

Fully automated manufacturing lines ensure precision production and guarantees product quality with no discrepancies.

COMFORTABLE OUTDOOR LIGHTING

TOYOLEDs' products attract far fewer insects in comparison to conventional lighting. The type of light emitted can be adjusted to maximise this effect.

* An LED's propensity to attract insects differ with the type of LED the luminaire or lamp uses.
* The surrounding lighting environment also plays a part in attracting insects. The presence of surrounding light sources that strongly attract insects will negate the insect-repelling characteristics of our LEDs. For maximum effect, installation of separate luminaires for insect attraction is recommended.

NO DIMMING OVER TIME

Initial Luminous Flux Correction Technology

Almost all competing manufacturers offer the maximum brightness upon initial installment. This inevitably leads to the depreciation of light emitted over time.

With the initial luminous flux correction technology, the LED retains its original properties throughout its life span. This unique, intuitive technology is a standard feature in all of our products.

No LED products have been able to provide enough light for specialized implementation or to withstand harsh environments, until now. Welcome to TOYOLEDs.

TOYOLED S

PHOS PHORUS

Street Lights

the only way is TOYOLED S

Most efficient street lighting ever - minimal light pollution and wasted light.

- 100% Market Share in Japan
- Unprecedented Long Lifespan
- Exceptional Cost Savings
- 73% Less CO₂ Emissions

LED STREET LIGHTS

ROAD Series
700/400/300

EFFICIENT ROAD ILLUMINATION
WITHOUT DIMMING THROUGHOUT LIFESPAN
NETIS No:QS-100026-V

ROAD Series-700/400/300

FEATURES

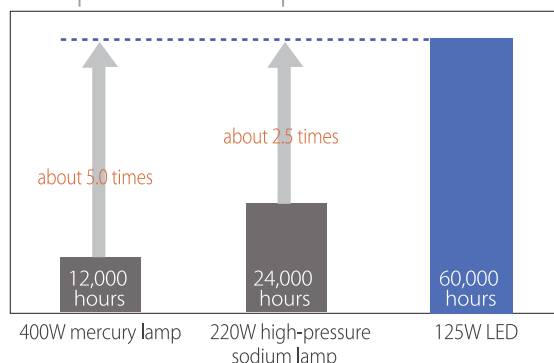

Huge Energy-Savings

Initial luminous flux correction increases LED life to 60,000 hours while having an average power consumption of 125W (at 200V), which is about 73% of the power consumed by a 400W mercury lamp and 56% of the power consumed by a 220W high-pressure sodium lamp.

Long Life Reduces Maintenance Costs

A 60,000-hour life dramatically lowers maintenance costs.

Comparison of Lamp Life

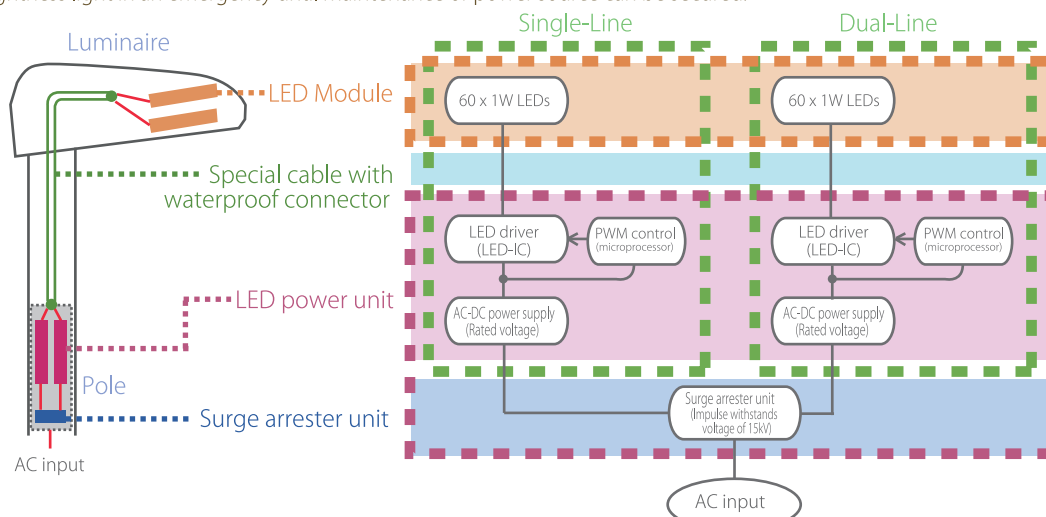

Easy Maintenance and Installation

The luminaire body has been designed for greater ease of installation and maintenance. The new design of the luminaire body features openings, that are compact yet wide to simplify installation and wiring work.

Dual-Line Operation Function

The circuits in TOYOLEDs ROAD Series are dual-lined. This technology means that if one line malfunctions, the remaining line will still provide half brightness light in an emergency until maintenance or power source can be secured.

Safety Design

■ Lightning and surge protection voltage: 15kV

■ Safety wires come standard

The luminaire body and power supply unit come with safety features designed to protect them from external electrical and physical impacts.

Initial Luminous Flux Correction

Current control provided by the microprocessor incorporated in the power supply ensures brightness is maintained at a constant level from initial lighting to the end of the LED life.

LED STREET LIGHTS

ROAD Series-400L/300L

- Reduces energy costs and CO₂ emissions by 73% or more compared to mercury lamps and 56% or more compared to high-pressure sodium lamps.
- Initial luminous flux correction.
- 70% dimming function for energy conservation.
- Dual line operation function and soft-start function ensures maximum safety for drivers and pedestrians.
- Extensive lamp life of 60,000 hours substantially cuts maintenance costs.

400L Continuous Illumination

For major arterial roads: average road luminance 0.7cd/m²
(road width 10.5m, installation interval 42m, installation height 12.0m)

TIWTR400L/W/1.1/1.19

Luminaire TIW7117-0+Power Unit WLE80V830M2C1/24-1
(100 to 242V, 50/60Hz)

With Initial Luminous Flux Correction
70% Dimming Function Weatherproof
Semi-cutoff Straight Pole/Arm Type

Rated Luminous Flux (Luminaire Luminous Flux)		Power Consumption	
11,900lm		112W (100V), 110W (200V), 110W (242V)	
Luminous Efficacy			
106.3lm/W (100V), 108.2lm/W (200V), 108.2lm/W (242V)			
LED Module Life		Light Colour	
60,000 hours		Equivalent to 5,000K	
		Colour Rendering Index (Ra)	
		70	

Specifications:

Body: Diecast Aluminum

Globe: Acrylic

Finish Colour: Metallic Silver

Arm Inserted Dimensions: \varnothing 60.5 (2B)X120mm

Power Supply Unit: WLE80V830M2C1/24-1

Protection Rating: Luminaire (TIW7117-0) IP23/Unit Case IP44

Weight: 10.6kg (Straight Pole Type), 10.4kg (Arm Type)

Luminance Distribution Diagram (400L):

Average Road Luminance : 0.74cd/m²
Total uniformity : 0.43

Design conditions : road width 10.5m, installation heights 12.0m, OH=0.7m,
maintenance factor : 0.7, asphalt road surface

300L Continuous Illumination

For major arterial roads: average road luminance 0.5cd/m²
(road width 6.5m, installation interval 40m, installation height 10.0m)

TIWTR300L/W/0.8/0.84

Luminaire TIW7120-0+Power Unit WLE80V860M2C1/24-1
(100 to 242V, 50/60Hz)

With Initial Luminous Flux Correction
Weatherproof
Semi-cutoff Straight Pole/Arm Type

Rated Luminous Flux (Luminaire Luminous Flux)		Power Consumption	
8,400lm		78W (100V),78W (200V),79W (242V)	
Luminous Efficacy			
107.7lm/W (100V), 107.7lm/W (200V), 106.3lm/W (242V)

Power Supply Unit: WLE80V860M2C1/24-1

Protection Rating: Luminaire (TIW7120-0) IP23/Unit Case IP44

Weight: 10.4kg (Straight Pole Type), 10.2kg (Arm Type)

Luminance Distribution Diagram (300L):

Average Road Luminance : 0.74cd/m²
Total uniformity : 0.44

Design conditions : road width 6.5m, installation heights 10.0m, OH=0.7m,
maintenance factor : 0.7, asphalt road surface

LED STREET LIGHTS

ROAD Series-700L/700C

- Reduces energy costs and CO₂ emissions by 73% or more than mercury lamps and 56% or more than high-pressure sodium lamps.
- Initial luminous flux correction.
- 70% dimming function for energy conservation.
- Dual line operation function and soft-start function ensures maximum safety for drivers and pedestrians.
- Extensive lamp life of 60,000 hours substantially cuts maintenance costs.

700L Continuous Illumination

For major arterial roads: average road luminance 1.0cd/m²
(road width 10.5m, installation interval 42m, installation height 12.0m)

TIWTR700L/W/1.6/1.65

Luminaire TIW7715-0+Power Unit WLE105V900M2C1/24-1
(100 to 242V, 50/60Hz)

- With Initial Luminous Flux Correction
- 70% Dimming Function
- Weatherproof
- Semi-cutoff
- Straight pole/Arm Type

Rated Luminous Flux (Luminaire Luminous Flux)	Power Consumption	
16,500lm	163W (100V),158W (200V),159W (242V)	
Luminous Efficacy		
101.2lm/W (100V), 104.4lm/W (200V), 103.8lm/W (242V)		
LED Module Life	Light Colour	Colour Rendering Index (Ra)
60,000 hours	Equivalent to 5,000K	70

Specifications:

Body : Diecast Aluminum

Weight : 11.1kg (Straight Pole Type), 10.9kg (Arm Type)

Product Dimensions (700L, 700C, 400L, 300L):

LED TUNNEL LIGHTS

TUNNEL

- Initial luminous flux correction.
- Longest lifespan, 90,000 hours. More than double that of standard LEDs.
- Pressed stainless steel frame is durable and has corrosion endurance, which makes it perfect for use inside tunnels.
- Light distribution technology developed over 50 years for HID lamps has been adapted for use with LEDs for this series. Utilizing the best characteristics of this design such as the high reflectivity aluminum reflector plates.

LED TUNNEL

Road Classification							Local Roads			Main Roads			Highway	
Traffic Volume (per day)							Under 10,000 units			Over 10,000 units

	Built-in Batteries			KWEP-075/03-2/24			35.1W	40VA						

※ Compatible with 200 ~ 240V, 265V, 415V and 460V by special order.

※1 Power consumption at 200V, this is the average value after 90,000 hours of usage due to the initial luminous flux correction function.

※2 Maximum VA is the maximum value after 90,000 hours of usage.

※3 63% dimming and 50% brightness of the 095 type available by special order.

※4 Dimming function of 50%, 32% and 50%, 25% of the 150 type is available by special order.

TOYOLED S

PHOS PHORUS

Flood Lights

lighting up the outdoors like never before

Efficient, lowest CO₂ emissions, baseball resistant (130km/h).

Perfect for:

- Exterior Lighting for Buildings, Offices, Hotels & Malls
- Outdoor Sports Facilities
- Bridges, Billboards, Harbours & Airports
- Factories, Warehouses, Wall Displays
- Petrol Stations, Parks, Parking Lots

LED OUTDOOR HIGH POWER
FLOOD LIGHTS

FLOOD DUELL Series
Narrow/Medium/Wide Beam

METAL HALIDE LAMP
1,500W/1,000W EQUIVALENT

LED HIGH POWER OUTDOOR FLOOD LIGHTS

FLOOD DUELL

Football Stadiums, Baseball Stadiums

- Glare Suppression: Luminance value is less than metal halide lamps.
- High Impact Resistance: Able to withstand impact of a baseball travelling at 130km/h.
- 3 variations of light distribution available (narrow, medium, wide).
- Initial luminous flux correction.
- Lightning surge protection voltage, 15kV.

FLOOD DUELL

(100-240V, 50/60Hz)

Common Specifications:

Body: Aluminum
Front Cover: Polycarbonate(Anti-Yellowing Processing)
Reflector: Polycarbonate
 (Narrow, Medium: Inner Surface Mirror Finish)
 (Wide: Medium White Painting)
Heat Dissipating Section: Aluminum Copper
Protective Cover: Stainless
Arm: Steel(Hot-Dip Galvanized)
Power Case: Aluminum
Design Wind Speed: 60m/sec
Heat Radiation System: Passive Cooling System
Operating Temperature: Limit -20℃~35℃
 (Up to 50℃ Temporary Operating Temperature During Summer)
Lighting Surge: Standard 15kV
 Initial Illumination Correction Function
Weight: 22kg

LED OUTDOOR HIGH POWER FLOOD LIGHTS

NOVA Series-400/200

Outdoor Sports Facilities, Billboards, Bridges, Harbors, Airports

- Utilizes highly efficient and high-powered COB-type LED package.
- Metal halide lamp capable of delivering brightness equivalent to 1,000W/400W.
- The combination of the reflector finish and globe design allows for three different types of luminous intensity distribution.
- An any-position design allows for various mounting directions and angles.
- Long life: 40,000 hours.

Street Lights

- Brightness equivalent to 500W self-ballasted mercury lamp while saving up to 82% energy consumption.
- A compact floodlight with the industry's highest level of brightness.
- 'Any-Position' operation mechanism enables installation in virtually any direction and at any angle.
- Utilizes highly efficient and high-powered COB-type LED package.
- LED module life of up to 40,000 hours.

High Bay Lights

(100 to 240V, 50/60Hz)

The graph shows the relationship between beam angle φ [mm] and illuminance lx. The x-axis represents beam angle φ in degrees, ranging from 3 to 0 to 4. The y-axis represents illuminance lx, ranging from 50 to 5,000. A curve is plotted, showing that as the beam angle decreases, the illuminance increases. Key points on the curve are labeled: 580 lx at 3.5°, 1,030 lx at 3.0°, 2,320 lx at 2.5°, 4,280 lx at 2.0°, and 9,280 lx at 1.5°. The curve approaches 5,000 lx as the angle approaches 0°.

(100 to 240V, 50/60Hz)

The angle is 1/2 illuminance angle, not beam angle

LED Module Life	Light Colour	Colour Rendering Index (Ra)
40,000 hours	Equivalent to 5,000K/3,000K	68 (5 000K), 80 (3 000K)

Weight: 5.5kg

LED HIGH BAY CEILING LIGHTS

FTERA Series-Type F/V

Warehouses, Factories, Indoor/Outdoor Sports Facilities, Gasoline Stations

- Utilizes highly efficient and high-powered COB-type LED package.
- Type F ensures illumination directly below the unit and Type V lights up a wider area below.
- Maintains the same brightness as a 400W metal halide or mercury lamp.
- Approximately 57% energy savings over a 400W metal halide lamp.
- Long life: 60,000 hours.

Type F Weatherproof

Landscape Lighting

The Imperial Palace

TOYOLED S

PHOS PHORUS

Landscape Lighting

lighting that matches its surroundings automatically

Not only is the brightness automatically controlled but the light direction is also controlled to ensure appropriate lighting.

- No Light Pollution, Does Not Attract as Many Insects
- Light can be Focused on Specific Areas
- Colour Switching Possible
- Solar Panel Products Do Not Require a Power Supply
- Ideal for Parks, Hotels, Resorts, Buildings, Garden, Walkways

LANDSCAPE LIGHTING

AREA Type - G

Parks, Gardens, Green Spaces, Residential Pathways

- Dimming control (20-100%).
- Tone control (red, blue, green, orange, white).
- Initial luminous flux correction.
- The ring-shaped design allows for a variety of customizable light distribution variations in order to maximize efficiency.
- Long life: 40,000 hours.

Rainproof **Omni-Directional** **Initial Luminous Flux Correction**

Pole Insertion Dimension: $\Phi 76.3 \times 110\text{mm}$

Weight: 13.6kg

Adjustable Light Distribution Variations

We have adopted this ring-shaped design as it can be used to effectively control light distribution and direction.

As there are multiple LEDs that make up this light fixture, the direction or amount of light necessary at any given time can be accurately controlled, allowing for maximum energy efficiency.

The standard lineup includes the "wide span form" and "high-efficacy form" that can be customized.

Omni-Directional Light Distribution

Horizontal Light Distribution

Forward Light Distribution

Omni-Directional Light Distribution and Wide Span Form

Omni-Directional Light Distribution and High-Efficacy Form

Wide Span Form

High-Efficacy Form

ARCHITECTURAL AND LANDSCAPE LIGHTING

APPROACH - Type D / Type R

Parks, Gardens, Green Spaces, Sidewalks, Pedestrian Pathways

- No glare as light source is concealed.
- Gives soft mood lighting to exterior landscaping and public areas, while providing enough visibility.
- 2 light distribution patterns: One-way and Omni-directional.

Rainproof

Omni-Directional

SOLAR LED Block and Tile Series

Parks, Roads, Villas, Pedestrian Pathways

- As a solar powered LED system, it does not require a power supply and there are no running costs.
- This product uses natural solar energy and the battery contains no hazardous heavy metals (lead or cadmium) and will therefore not impact the environment.
- Custom design: Product can be manufactured to suit application.

Surface-Emitting LED Weatherproof

8-Hour Surface-Emitting LED

SLBRN/W/B/G/L

12-Hour Surface-Emitting LED,
Long-Hour Type

SLBRN/W-14/B-14/G-14/L-14

LED Module Life
40,000 hours

Body:

Polycarbonate Resin
(Top and Bottom Case)

Solar Cell:

Amorphous Silicon

Battery:

Electrical Double Layer Capacitor

Operating Time (when fully charged):

8 hours (Surface-Emitting LED)

15 hours (Surface-Flashing LED,
Long-Hour Type)

Charging Time (to fully charge):

6 hours (20,000lx in Cloudy Weather)

On/Off:

Goes on automatically at dusk and
turns off automatically at dawn.

Skid Resistance (when wet):

40BPN or more.

Weight: 0.94kg

※Clear dot type that allows for custom
design.

Surface-Emitting LED Weatherproof

8-Hour Surface-Emitting LED

SLB100/W/B/G/L

12-Hour Surface-Emitting LED,
Long-Hour Type

SLB100/W-H/W-B/W-G/W-L

LED Module Life
40,000 hours

Body:

Polycarbonate Resin
(Top and Bottom Case)

Solar Cell:

Amorphous Silicon

Battery:

Electrical Double Layer Capacitor

Operating Time (when fully charged):

8 hours (Surface-Emitting LED)

15 hours (Surface-Flashing LED,
Long-Hour Type)

Charging Time (to fully charge):

6 hours (20,000lx in Cloudy Weather)

On/Off:

Goes on automatically at dusk and
turns off automatically at dawn.

Skid Resistance (when wet):

40BPN or more.

Weight: 0.49kg

※Clear dot type that allows for custom
design.

Surface-Emitting LED Weatherproof

8-Hour Surface-Emitting LED

SLB85/W/B/G/L

12-Hour Surface-Emitting LED,
Long-Hour Type

SLB85/W-H/B-H/G-H/L-H

LED Module Life
40,000 hours

Body:

Polycarbonate Resin (Top Case)
PC/ABS Resin (Bottom Case)

Solar Cell:

Amorphous Silicon

Battery:

Electrical Double Layer Capacitor

Operating Time (when fully charged):

8 hours (Surface-Emitting LED)

15 hours (Surface-Flashing LED,
Long-Hour Type)

Charging Time (to fully charge):

10 hours (20,000lx in Cloudy Weather)

On/Off:

Goes on automatically at dusk and
turns off automatically at dawn.

Skid resistance (when wet):

40BPN or more.

Weight: 0.43kg

Surface-Emitting LED Weatherproof

SLB120G/W/B/G/L

LED Module Life
40,000 hours

Body:

Hard Glass

Solar Cell:

Single-Crystal Silicon

Battery:

Electrical Double Layer Capacitor

Operating Time (when fully charged):

8 hours

Charging Time (to fully charge):

6 hours (20,000lx in cloudy weather)

On/Off:

Goes on automatically at dusk and
turns off automatically at dawn.

Weight: 1.7kg

TOYOLED S

PHOS PHORUS

Interior Lights

light up your home in style

Designed for interior use in homes, restaurants, corridors, commercial facilities hospitals and hotels.

- Various Colours in One Light with Very Clear Colour Differentials
- Remote Controlled Dimming

LED PENDANT LIGHTING

KARA

Restaurants, Hotels, Table Lighting

- Warm & colourful RGB.
- Smartphone App compatible lighting control utilizing WiFi and remote control for individual or group light adjustment.
- A plethora of areas can be constructed using varying colours to differentiate between spaces. E.g. a green zone for a children's play area and a blue zone for the waiting area.

KR

AC100-277V, 50/60Hz (47-63Hz)

Rated Luminous Flux (Luminaire Luminous Flux)	Power Consumption
620lm	15W (White10W, RGB 5W)
Input Voltage	LED Module Life
100-240VCA / 100-277VCA	50,000 hours
Light Colour	Colour Rendering Index (Ra)
Equivalent to 3,000K	80

Specifications:

Base: Cast Aluminum

Globe: Polycarbonate or Glass

Size (W x L): $\Phi 283.5\text{mm} \times 760.5\text{mm}$

Weight: 1.3kg

Installation Hole: Recommended $\Phi 0.78"$ ($\Phi 20.0\text{mm}$)

Customizable Sensual Lighting

The main lighting of white and sub-lighting of RGB can be set in various ways, allowing for a variety of lighting which will keep spaces from becoming boring and stale. The interior of a single space can change dramatically through simple lighting adjustment.

Securing Space Identity (Coloured Zones)

A differentiated space within a certain area can be secured by assigning different colour lighting. The atmosphere and emphasis of each space can be enhanced through simple lighting adjustment.

Remote Controlled Dimming & Colour Change

The remote control allows the user to set, save and load preferences with ease. Individual and group control allow for adjustment of colour and brightness at anytime in any location.

LED INTERIOR LIGHTING

DL Series - Easy Fit

**Business Spaces, Hotels
Hospitals, Residences**

Available in a Variety of Sizes / User Friendly

Superior fittings allow for easy installation!

Features of the DLSK Series

Highly efficient lighting with low power consumption and long lifespan.

This series is compact and easy to install.

Easy installation allows for instant change in room ambience.

GX53-1 Base

Extremely simple slide and turn installation with GX53-1 base fitting.

LED INTERIOR LIGHTING

Available in a wide range of colours to suit individual user preferences.
Compact and slim downlights that can be installed with ease.

LED INTERIOR LIGHTING

BAR Series

**Display Lighting, Architectural Lighting
Hotels, Business Spaces, Hospitals**

- Emulates bright natural lighting: Alternative to T5 LED lights.
- 2 types of BAR lighting suited to individual needs.

BREZC Series

< BR300EYC / 600EYC / 900EYC / 1200EYC >

Characteristics

Alternatives to T4 / T5 fluorescent light fixture products.
SMPS built-in model and easy installation with fixing clip and connection socket.
No 'dark zone' at joints of light fixtures.
Light diffusing PC used to avoid flickering lights.

BREZW Series

< BR300EZW / 600EZW / 900EZW / 1200EZW >

Characteristics

6 stages of angle adjustment to create various interior effects.
Perfect alternative to fluorescent and united lighting.
No 'dark zone' at joints of light fixtures.

6 Stages of Angle Adjustment

※ To adjust the angle of BREZW, the permitted angle is MAX. 90°.

Installation Method

BREZC / BREZW

Easy to install. Both vertical and flat installation is possible. Firm attachment for durability and easy maintenance.

※Connecting "BREZC" type

1. Screw the fixing clip to installation location.
2. Place light fixture into the fixing clip.
3. Insert power cord.
4. When connecting 2 or more, use connection socket between lights.
5. For corners, use connector cable.
6. For end light fixture, place cover for safety.

Uninterrupted Light Source < BREZC / BREZW >

※The images is for connecting "BREZC" type.

There is an inevitable 'dark zone' that arises at the joints when joining florescent bar lights.
The BREZC/BREZW series do not have 'dark zones' at the joints and provides uninterrupted lighting throughout.
This allows for higher aesthetics for service industry facilities such as shops and restaurants.

LED MODULE UNIT

i-LED Series

Architectural Lighting (Indirect Lighting), Wall Displays, Advertising Signboards

- High quality LED module which emits beautiful scenic lighting.
- Various lighting effects are possible for use for signboards, effect lighting and indirect lighting.
- Display 7 different light display movies that can be saved onto a single SD card.

(i-PANORAMA MODULE)

i-LED AC MODULE 4

IP67

※ 1. A Transformer is required for power connections outside 100V.

Part No.	Power	Voltage	Color Temperature	Base	Beam Angle	Lumen (lm)
i-LED AC MODULE 4-40-120	1.7W	※1 AC100V	4,000K	Unit	120°	-
i-LED AC MODULE 4-60-120			6,000K			

Size	(m m)	W40×H40×D8.7
Weight	(g)	30
Base		Unit
Voltage	(V)	AC100 ※1
Supply Current	(m A)	10
Power	(W)	1.7W
LED Type		3 Chips Top LED
Number of LED		4
Beam Angle	(°)	120°
CRI	(R a)	>80
Colour Temperature	(K)	4,000 / 6,000
Life Time	(h)	50,000
Operating Temperature	(°C)	-20℃ ~ 60℃
Dimmer		Dimmable With Special Controller

Example of Connection

You can chose the numbre of modules depending on the requirements.

Installment of LED Module

1. Preparation for Installation:
To fix the LED module firmly, wipe dust, water and oil from the installment surface.
2. Decide the Position of Module:
Tentatively fix LED module with double-sided tape (on the backside).
3. Fix LED Module:
This double-sided tape is extremely adhesive, however, use of silicon and screws is required to reinforce module.
4. Confirmation:
Insulate unit with friction tape or plastic tape for ct cables between LED modules.
(Waterproof for outside use.)
5. Check the Lighting of LED Module.
※ For outside installment make sure to waterproof and remove moisture from fixture holes and surfaces.

Example of Connection

※ The layout image is a rough estimate.

i-PANORAMA MODULE

Part No.	Power	Voltage	Color Temperature	Base	Beam Angle	Lumen (lm)
i-PANORAMA MODULE- RGB-120	2.88W	DC12V	RGB	United Base	120°	-

Controller Attributes (DS_PANORAMA-16CH)

Input Power :	9~24V DC
Module :	Interactive Chip LD1510 (LDT Co.) _ 8BIT Mode
Max Connection :	4,096 Modules (8 channel 512 each)
Output Signal Type :	RS422 (Receiver Connection to Module)
No. of Videos :	7 (AVI)
Mode :	Auto (Preference Set by User) / Manual
Frame Rate :	50 frame per 1 sec (Max) : Adjustable Speed
Program :	SD Card (Bigger Than 0.5 GigaBytes)

Size	(m m)	W53×H53×D8
Weight	(g)	35.5
Base		Unit
Voltage	(V)	12
Supply Current	(A)	0.24
Power	(W)	2.88W
Number of LED		4
Beam Angle	(°)	120°
Wire Length	(m m)	61±3
Operating Temperature	(°C)	-30℃ ~ 60℃
Dimmer		Full Color

1. Save up to 7 display movies onto an SD card.
2. Mode:

a.) Auto Mode: Select the video and can play the selected movie only.

b.) Manual Mode: Play selected movies 1 through 7.
3. Built in RS 422 sender and a long-distance telecommunication available.

Mode change

1. Mode Switch

1) Push the button once and switch to Auto mode / Manual mode.

2) Prolonged push to switch to setting mode.
2. Mode

a.) Auto mode: Play the movies selected on setting mode.

b.) Manual mode: Turn mode switch off and play selected movies from 1 through 7.

c.) Setting mode: Select movies to play once mode switch is blinking.
3. Switch No. 1~7:

(at manual mode) only play selected movie out of No.1-7.

i-LED AC MODULE 3

Part No.	Power	Voltage	Color Temperature	Base	Beam Angle	Lumen (lm)
i-LED AC MODULE3-30-120	1W	※1 AC100V	3,000K	Unit	120°	-
i-LED AC MODULE3-60-120			6,000K			

Size	(mm)	W68×H19×D10
Weight	(g)	20
Base		Unit
Voltage	(V)	AC100 ※1
Supply Current	(mA)	25
Power	(W)	1W
LED Type		3 chips Top LED
Number of LED		3
Beam Angle		120°
Colour Temperature (K)		3,000 / 6,500
Lifespan	(h)	40,000
Operating Temperature (°C)		-20°C ~ 50 °C

※1. A Transformer is required for power connections outside 100V.

TOYOLED S

PHOS PHORUS

AHMED & HIROYUKI TOYODA
GENERAL TRADING L.L.C.

PROJECT: DUBAI SUSTAINABLE CITY

We are proud to announce that TOYOLED S has been appointed to deliver all lighting equipment for the Sustainable City in Dubai.

The Sustainable City in Dubai will be the first residential community of its kind in Dubai and is expected to meet the highest environmental standards by adopting a sustainable approach in its quest to become a regional leader in eco-tourism and global environmental protection.

The Sustainable City in Dubai is the first Net Zero service and maintenance free city in Dubai. A first of its kind, it is considered as one of the most unique developments in the world. It meets and exceeds international sustainability standards.

The exterior lighting design will comply with LEED ND Credit #17 Light Pollution Reduction to meet the following targets:

1. 50% of external lighting should be controlled by motion sensors to switch off after 15 minutes of non-use.
2. Lighting to automatically switch off during night-time.

Sources of light may be from LEDs, fibre-optics, compact fluorescents, photo luminescent material, and low-watt metal halides. The lighting sources and energy consumption need to be matched and customised for each application.

All poles will be of FSC certified timber construction and data sheets will be provided for all fixtures quantifying energy consumed during the manufacturing process.

The sustainable goal of the exterior lightings is to be an average of 1 watt per square metre over the entire public area.
